

ABOUT FUCARE

*Blast/Ballistic Protection Solutions
For Shelters & HVAC Systems*

With **FuCare** Comes **Safety**

FUCARE is a safety company with its headquarter in Singapore, specializing in developing and manufacturing protection products for safety shelters with focus on construction materials like special metal doors and windows, HVAC valves aswell as dampers, against blast and ballistic threats. With its continuous investment in technological revolutions making use of the latest research technologies and innovations, FUCARE has featured its products offering range by high protection performance and functional performance.

FUCARE has set up two manufacturing facilities in Asia aside from its headquarter in Singapore, including FUCARE PROTECTION SDN. BHD., in Kulai, Johor, Malaysia, and WUXI FUCARE INDUSTRIAL CO. LTD., in Wuxi, Jiangsu, China, to serve global customers with high quality protection products at competitive prices.

[FUCARE Products]

FUCARE product lines consist of blast valves/dampers, heavy-duty bubble-tight dampers, air tight dampers, blast doors and windows, bullet-proof doors/windows, blast overpressure valves/dampers, air purifying devices and accessories. We are working hard on product development and trying to provide the best mix of products to our customers regarding blast protection and air safety solutions.

We also offer technology consulting service for blast protection, such as protection performance evaluation and rating upon request.

FC-RBV-11 Series
Blast Valves

FC-RBV-31 Series
Blast Valves

FC-BRV-02 Series
Rapid Blast Dampers

FC-BRV-21 Series
High-performance Blast Dampers

FC-BRD-01 Series
Blast Doors

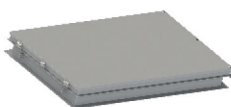

FC-BRD-01-S Series
Sliding Blast Doors

FC-BPD-PH Series
Ballistic Doors

FC-BRW-EI Series
Blast Windows /
FC-BPW Series
Ballistic Windows

FC-OPD-01 Series
Blast Pressure Relief Dampers

FC-RLD Series
Heavy duty Bubble-tight dampers

FC-BRS-01 Series
Blast Wall sleeves

FC-INF-DF Series
Compact Inertial Filters

[Our Advantages]

➤ Professional R&D team

FUCARE is experienced in structural designs against blast waves in the following areas:

- Blast wave dynamic analysis
- Blast load and its effect on structures
- Flow efficiency in different structures

➤ **High performance product solutions**

With state-of-the-art product design, FUCARE is able to provide high performance products which carry more safety margin for customers. All product solutions have been certified and the majority of its product lines have been internationally certified.

➤ **ISO9001-2015 Certified**

With ISO9001-2015 quality system, FUCARE applies the strictest quality management to the products.

➤ **Strong Technology Support**

FUCARE has a professional team to satisfy customers in technology consulting, customized solution development. FUCARE is also able to provide remote support by means of video conferences, web meetings so as to serve the needs of international customers.

➤ **Proved by Market**

FUCARE has served a great number of customers in defense and industry market segments. Our customers include reputable clients, such as Petronas, Aramco, ADNOC, KNPC, KOC, ExxonMobil, BP, Qatar Energy, BASF, Air Products, as well as EPCs like CCC, JGC, Petrofac, WorleyParsons, and Technip. FUCARE also has served military projects for governments in North America, Middle-East and South-Asia.
