

FC-BPW High-security Ballistic Windows

**UL752 Rated Level 5/7/8
Protection Against Assaulting Weapons**

FC-BPW High-security ballistic windows are designed to provide high-level ballistics protection to many high-risk military installations, government buildings, embassies, and VIP residences. The protection performance of this product meets UL752 Level 5, Level 7 and Level 8 and it is type tested by Intertek.

The frames of FC-BPW High-security ballistic windows are available with multiple options to meet various applications such as in-wall installation for benefits of energy saving and minimum cleaning work

[Technical Data]

Ballistic Protection	UL752 Level 5 (FC-BPW-PE)
	UL752 Level 7 (FC-BPW-PG)
	UL752 Level 8 (FC-BPW-PH)
Frame materials	PU coated steel/HGS/Stainless steel
Glazing	Laminated glass

Note: FC-BPW High-security ballistic window also offers great blast protection but its blast-resistance performance is related to ballistic type and glazing size. Please contact FUCARE or its distributor for more info about blast resistance performance for specific product.

[3rd Party Test]

Products are rated according to UL752 by Intertek. Test reports are available upon request.
